MAR 29 2018

Steve Min, D.O.
Radiation Safety Officer
Genesys Regional Medical Center
One Genesys Parkway
Grand Blanc, MI 48439

Dear Dr. Min:

Enclosed is Amendment No. 18 to your NRC Material License No. 21-26740-01 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078.

In this amendment, we deleted all authorization for materials in 10 CFR 35.400 from your license, including removal of the location of use at Genesys Hurley Cancer Institute, 302 Kensington Avenue, Fling, Michigan; the removal of Paul Kocheril, M.D. and Ahmed M. Akl, M.D. as authorized users; the modification of authorization to remove materials in 10 CFR 35.400 from the authorizations for Ram K. Gadam, M.D. and Dong-Whan Oh, M.D.; and the removal of Ibrahim S. Abdulhay, Ph.D. as Assistant Radiation Safety Officer (RS)) (brachytherapy) in Condition No. 11.B., as it appeared on Amendment No. 17.

As a result of these changes, parts of your license have been reordered and renumbered so please check your license carefully so that you understand all the changes made.

Please also note that, 18 years ago, in 2000, NRC adopted the Agencywide Documents Access and Management System (ADAMS) as its official agency records repository. We have notified all our licensees about this many times over the years.

As a result of this change, we no longer need any licensee to submit duplicate copies of licensing correspondence of any kind. In fact, in my letters to you dated December 27, 2017, and February 1, 2018, I specifically called this out to your attention as follows:

"Please only send us one complete, written, currently dated and legibly, physically signed (by an appropriate senior management official) correspondence document, such as either an NRC Form 313 or a business-style letter containing the same information as an NRC Form 313a. Please ensure that the requested information is answered completely and accurately.

Please do not send multiple copies of responses and please do not submit any information that is identical to what you have already sent us. Please do not email a PDF document to us, and transmit a faxed version, and/or a hard copy sent by mail.

Only one copy transmitted in only one of these ways is appropriate to prevent administrative processing errors.”

However, we received duplicate copies of your letters dated January 22, 2018, and March 15, 2018, which were unnecessary.

Please refrain from sending us more than one document hereafter unless the requests or responses are different or incomplete. It is best to just send one complete, currently dated and signed request.

Your efforts and cooperation in this matter are greatly appreciated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

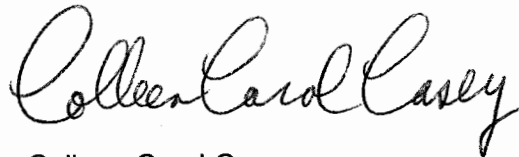

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

S. Min

- 3 -

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
