CORRECTION PAGE FOR RADIOACTIVE EFFLUENT RELEASE REPORT - 21  
SALEM GENERATING STATION  
DOCKET NOS. 50-272 AND 50-311

Attached please find the correction page for page 6 of the semi-annual Radioactive Effluent Release Report, RERR-21 which was transmitted to you in our letter dated February 27, 1987. The exponential term for the total body dose for liquid pathways was inadvertently omitted as a result of a typographic error. The correct total body dose should read 3.6E-01 mrem. The correction is shown on the attached page with a vertical line in the right margin.

Should you have any questions regarding this correction, please feel free to contact us.

Sincerely,

B. A. Preston  
Manager - Licensing & Regulation
