General Comment

Wind Turbines are not working in Winder, According to Eurostat, 8.7 percent of Europeans cannot afford to heat their homes. One million families in the UK already fall into that category; some are as much as 10,000 short of paying their bill. government policies designed to discourage the use of fossil fuels mean that a growing number of people cannot afford to pay their skyrocketing energy bills. alternative energy has not only failed to flourish but threatens the capacity of the grid itself. Germans nearly suffered the fate of second-world countries, a massive power outage, as a dark and windless January 24th strained the nation's power reserves almost to the breaking point.

The renewables could not even provide five percent of" demand, said Michael Vassiliadis of IG Bergbau Chemie Energie. "Coal, gas and nuclear power were virtually alone in keeping the country in power." According to Switzerland's Basler Zeitung, "is the increasing number of solar and wind turbines in Germany." European Greens follow an ideologically driven passion to replace fossil fuels with untested, untried, and unreliable renewable energy sources,
