United States Nuclear Regulatory Commission  
Document Control Desk  
Washington, DC 20555

Gentlemen:

REQUEST FOR ADDITIONAL INFORMATION  
REQUEST FOR AMENDMENT 87-02  
SALEM GENERATING STATION  
UNIT NOS. 1 AND 2  
DOCKET NOS. 50-272 AND 50-311

Pursuant to a telephone conversation with Mr. J. Stone, Salem Licensing Project Manager, attached is additional information relative to PSE&G's License Change Request (LCR) 87-02. This additional information is provided to clarify a portion of the requested change relative to Generic Letter 84-13, removal of snubber tables from the Technical Specifications. The attachment provides justification for removal of a paragraph from the Technical Specifications which was beyond the scope of the changes proposed by Generic Letter 84-13. Additionally some of the previously submitted Technical Specification pages are being resubmitted to correct typographical or editorial errors in our original submittal. Also included is page 6-22 from the Unit 1 and 2 Technical Specifications which was inadvertently omitted from our previous submittal.

Should you have any questions, please feel free to contact us.

Sincerely,

Attachment
