

NOV 22 1988

Docket Nos. 50-272
50-311

Public Service Electric and Gas Company
ATTN: Mr. Steven E. Miltenberger
Vice President and Chief Nuclear Officer
P. O. Box 236
Hancocks Bridge, New Jersey 08038

Gentlemen:

Subject: NRC Combined Inspection Report No. 50-272/88-18; 50-311/88-18

A routine radiological controls inspection was conducted by Mr. R. L. Nimitz at the Salem Nuclear Generating Station on September 26-30 and October 5-6, 1988. Areas reviewed during the inspection included action on previous NRC findings, organization and staffing, training and qualifications, corrective action systems, external and internal exposure controls, ALARA and worker concerns. The findings of the inspection were discussed with Mr. S. LaBruna on September 30, 1988 and Mr. L. Miller on October 6, 1988.

Within the scope of this inspection, one apparent violation of NRC requirements was identified and is discussed in the enclosed Appendix A, Notice of Violation. The violation involves a number of examples of failure to implement radiation protection procedures. The inspection also identified a number of weaknesses in the supervisory and management oversight of ongoing radiological work activities, weaknesses in your industrial safety program and weaknesses in the corrective action system for radiological controls deficiencies.

You are required to respond to the enclosed Notice of Violation and should follow the instructions contained therein. In your response, please describe your actions taken or planned to improve the supervisory and management oversight of radiological work activities and improve the corrective action process for identified deficiencies.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
Ronald R. Bellamy

Ronald R. Bellamy, Chief
Facilities Radiological Safety
and Safeguards Branch
