Nuclear Department

February 2, 1989
NLR-N89020

Document Control Desk
United States Nuclear Regulatory Commission
Washington, DC 20555

Gentlemen:

SALEM GENERATING STATION
UNIT NOS. 1 AND 2
DOCKET NOS. 50-272 AND 50-311
LICENSE CHANGE REQUESTS 84-01, 84-15 AND 86-01

Based on comments received from the NRC, PSE&G is currently in the process of revising LCR 84-01 and LCR 86-01. Therefore, there is no need for any additional NRC review of these License Change Request's (LCR) until the new revisions are submitted (March, 1989). As discussed previously with the NRC, the changes requested in LCR 84-15 will also be incorporated into the revision to LCR 86-01 in order to provide for a more efficient NRC review process. Therefore, by copy of this letter, PSE&G is formally withdrawing our Request for Amendment contained in LCR 84-15.

If you have any questions with regard to this, please do not hesitate to contact us.

Sincerely,

B. A. Preston
Manager - Licensing & Regulation
