**DOMINION ENERGY NUCLEAR CONNECTICUT, INC.**  
**MILLSTONE POWER STATION UNITS 2 AND 3**  
**NOTIFICATION OF ACTION COMPLETION FOR CONFIRMATORY ORDER**  
**EA-17-077 – ITEMS D.1 AND E.1**

On November 21, 2017, the Nuclear Regulatory Commission (NRC) issued Confirmatory Order EA-17-077 to Dominion Energy Nuclear Connecticut, Inc. (DENC). Section V of the Confirmatory Order requires DENC to complete Items D.1 and E.1 within 180 days of issuance of the Confirmatory Order, and to notify the NRC in writing within 30 days of completion. On March 9, 2018, DENC evaluated the implementation of the Armorer function at Millstone Power Station (MPS) per Item D.1, and reviewed the process for performing and recording in-service and out-of-service weapons inventory per Item E.1. The evaluations included a comparison of the MPS processes to other Dominion Energy and non-Dominion Energy nuclear stations. Results of the evaluations were captured in a Station Performance Improvement Report (PIR). The PIR identified strengths and also recommended enhancements, which are being reviewed for implementation. As specified in Items D.1 and E.1, the evaluation results are available to the NRC for review during an inspection.

If you have any questions concerning this matter, please contact Michael Whitlock at (804) 273-3123.

Sincerely,

A handwritten signature in black ink that reads "Dan Stoddard".

Daniel G. Stoddard  
Senior Vice President and Chief Nuclear Officer  
Dominion Energy Nuclear Connecticut, Inc.
