Lisle, IL 60532-4352

**REQUEST FOR LICENSE AMENDMENT (13-26398-01) TO DECOMMISSION SITE 2,  
FOWLER, IN AND RELEASE FOR UNRESTRICTED USE**

Dear Ms. Tomczak,

Dow AgroSciences, LLC requests a license amendment to decommission Site 2, Midwest Field Research Station located at 1736 N 1200 E, Fowler, Indiana 47944 (Benton County), Appendix I, releasing it for unrestricted use and removing it from the radioactive materials license 13-26398-01.

**A. License Information**

The Type A Broad Scope License currently authorizes the use of small amounts of <sup>14</sup>C for plant metabolism research studies.

**B. Historical Information**

Although authorized for research with radioactive materials, no radioactive materials have been used, applied, or stored at the Fowler site. There is a dedicated fenced in area 150' x 250', Appendix II and III, specifically designed to isolate the area and restrict access in the event a radioactive study would have been conducted but has not been used for this purpose. In addition to the address listed above, the station location consists of the following legal description NE ¼ of S 9, T 25 N, R 6 W, and E½ of N ¼ S9, T 25 N, R 6 W and S ½ of S W ¼ Section 4, T 25 N, R 6 W.

**C. Decommissioning**

Because no radioactive materials have been used, applied, or stored at the Fowler site in any capacity, no samples were taken and no surveys were deemed necessary for decommissioning. All radioactive materials signs, NRC Form 3, the site copy of the NRC Type A Broad Scope Radioactive Materials License, 13-26398-01, and Indiana State Radioactive Materials Registration were all removed from the site.

Please contact me with any questions or requests for additional information regarding our amendment request.

Sincerely,

*Kevin P. Smith*

Hi Lauren, Tae and Sandy ☺

Can you please put this into ADAMS? I would bring a copy over but I NO LONGER HAVE A PRINTER ☹

Thank you :)  
Tammy
