United States Nuclear Regulatory Commission  
Document Control Desk  
Washington, DC 20555

Gentlemen:

REQUEST FOR AMENDMENT - ADDITIONAL INFORMATION  
SALEM GENERATING STATION  
UNIT NOS. 1 AND 2  
DOCKET NOS. 50-272 AND 50-311

Attached are revised pages B3/4 8-1 for Salem Units 1 and 2 and 3/4 8-16 for Unit 2 for incorporation into License Change Request 88-08. These pages are being provided pursuant to a conversation with Mr. J. Stone, NRC Licensing Project Manager. Additionally, PSE&G is requesting that implementation for Unit 1 be delayed until startup from the 9th refueling outage, currently scheduled for Fall 1990. This will allow sufficient time for procedure development and performance of surveillances to meet the new requirements. The Unit 2 specifications can be implemented within 60 days of issuance.

Should you have any questions, please feel free to contact us.

Sincerely,

B. A. Preston  
Manager - Licensing & Regulation
