On November 14, 1989, Public Service Electric and Gas Company (PSE&G) submitted revision 3 of a request for license amendment. The license change would allow an individual the option of holding or having held an SRO license as a condition to fill the position of Operations Manager. Mr. J. Stone, the project manager for SGS, informed PSE&G that the revised Technical Specification pages, included with the amendment request, contained changes from another amendment request that has not been approved. This letter forwards the corrected Technical Specification pages.
