Gentlemen:

Subject: NRC Combined Inspection Report No. 50-272/90-14; 50-311/90-14

A routine radiological controls inspection was conducted at the Salem Nuclear Generating Station by Mr. R. L. Nimitz during the period May 1-4, 1990. Areas reviewed during the inspection are discussed in the enclosed report. The findings of the inspection were discussed with Mr. L. Miller on May 4, 1990.

The inspection noted improvements in radiological controls for steam generator work activities and ALARA planning and control of on-going work activities. Although improvement was noted in the area of housekeeping, weaknesses were noted in this area.

Within the scope of this inspection, one apparent violation of NRC requirements was identified and is discussed in the enclosed Appendix A, Notice of Violation. The violation involved failure to implement radiation protection procedures.

You are required to respond to the enclosed Notice of Violation and should follow the instructions contained therein.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
