Docket Nos. 50-272
50-311
50-354

Public Service Electric and Gas Company
ATTN:Mr. S. E. Miltenberger
Vice President and Chief Nuclear Officer
P.O. Box 236
Hancocks Bridge, NJ 08038

Gentlemen:

Subject: Combined NRC Inspection Nos. 50-272/91-01; 50-311/91-01; 50-354/91-01

This letter transmits the findings of the routine, resident safety inspection conducted by Mr. T. Johnson and others from January 1, 1991, to February 12, 1991, at the Salem and Hope Creek Nuclear Generating Stations. The findings were discussed with Mr. S. LaBruna and Mr. J. Hagan of your staff.

Within the scope of this inspection, the inspectors identified two non-cited violations as detailed in the report. These items involved failure to (1) maintain the auto-start capability for the Motor Driven Auxiliary Feed Water pumps on loss of Steam Generator Feed Pumps (Salem Unit 1); and (2) perform Diesel Generator Operability Checks within the specified surveillance period (Salem Unit 2). In these instances of noncompliance we exercised our discretion and refrained from issuing a Notice of Violation since these items exemplified your initiative for self-identification and correction as described in Section V.G of the NRC Enforcement Policy. Consequently, no reply to this letter is required.

Your cooperation with us is appreciated.

Sincerely,
Original Signed By

Larry Doerflin for

A. Randolph Blough, Chief
Projects Branch No. 2
Division of Reactor Projects
