

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

September 10, 1991

Docket Nos. 50-272  
and 50-311

Mr. Steven E. Miltenberger  
Vice President and Chief Nuclear  
Officer  
Public Service Electric and Gas  
Company  
Post Office Box 236  
Hancocks Bridge, New Jersey 08038

Dear Mr. Miltenberger:

SUBJECT: ALLEGATION NRR-90-A-0050, SALEM NUCLEAR GENERATING STATION, UNITS 1  
AND 2

Thank you for your letter dated January 4, 1991, in response to our November 20, 1990 letter concerning allegations pertaining to potentially unacceptable materials being supplied to the Salem Nuclear Generating Station, Units 1 and 2 (Allegation NRR-90-A-0050).

In our letter, we requested that you review your procurement records and determine whether the supplier in question had provided safety-related or other materials to your plant. If this supplier did provide such materials to your site, we requested that you review your audit, receipt, inspection, testing records and any other information relevant to the allegation to determine if you have identified any discrepancies or information which would support the allegation. Furthermore, if the material had been installed in important safety applications, we requested that the allegation be taken into account in determining any additional actions. The results of your investigative activities were to be submitted to the NRC.

Your response indicated that the allegation has been found to be unsubstantiated and therefore is without merit. We find your investigation to be sufficient and have no further questions regarding this matter. Accordingly, Allegation NRR-90-A-0050 is considered closed. We request that you retain any supporting documentation for your investigation of this allegation for a minimum of one year from the date of this letter.
