**NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM  
DISCHARGE MONITORING REPORTS  
SALEM GENERATING STATION  
PERMIT NO. NJ0005622**

Enclosed, please find corrected pages for the October 1992 Discharge Monitoring Report (DMR). An incorrect code was entered into the reporting fields for DSNs 487B and 489A. As these outfalls had no discharge during the reporting period, the reporting code "NODI" should have been entered in place of "CODE=N" which was incorrectly reported. The corrections have been highlighted to facilitate the update to your records.

If you have any comments or questions, please feel free to contact Richard F. Quinn at (609) 339-2665.

Very truly yours,

C. A. Vondra  
General Manager -  
Salem Operations
