Regulatory Docket File

Office of Nuclear Reactor Regulation  
Attn: Mr. Dennis L. Ziemann, Chief  
Operating Reactors Branch #2  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Ziemann:

Re: St. Lucie Unit No. 1  
Condition of License E.2  
Supplemental Information

Information concerning FPL compliance with Condition E.2 of the St. Lucie Unit No. 1 Operating License has been forwarded to you by my letter L-76-233 of June 22, 1976.

The Condition of License E.2 requires installation of the Sesimic Category I, permanent, ultimate heat sink (UHS) barrier dam (not including water flow control gates/valves). This is to advise you that removal of the temporary construction dikes used for dewatering operations to facilitate construction of the UHS barrier wall and to serve as the interim UHS barrier, will be completed on or before July 31, 1976. With the removal of the temporary earthen dikes, the barrier wall will be functional as the interim UHS without reliance on earthmoving equipment.

This information is supplemental to our previous submittal.

Yours very truly,

*Robert E. Uhrig*  
Robert E. Uhrig  
Vice President
