General Comment

Regarding Docket ID NRC-2018- 0052:

Having only four NRC public comment meetings is woefully inadequate. Countless millions of Americans, in most states in the Lower 48, would be put at risk by these highly radioactive, irradiated nuclear fuel shipments by train, truck, and/or barge. More hearings should be scheduled so that more Americans can learn about the dangers they are facing, and to tell you that they refuse to accept them.
