Mr. Cox,

I work with Andy Hon at the U.S. NRC on the Brunswick Steam Electric Plant.

As a follow-up to my phone message from this afternoon, the U.S. Nuclear Regulatory Commission (NRC) is about to issue license amendments for the Brunswick Steam Electric Plant, Units 1 & 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of these amendments.

Please reply if the State of North Carolina has comments on the following licensing action submitted to the NRC by Duke Energy (the licensee): "Request for License Amendment for Performance-Based Fire Protection Alternative for Thermal Insulation Material" dated November 15, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17331A484).

The associated proposed no significant hazards consideration for this amendment request was published in the Federal Register on February 13, 2018 (83 FR 6221).

Your response is requested by April 13, 2018. If you have any questions, please call or e-mail me.

Thanks,

Perry Buckberg

Senior Project Manager
