NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

April 9, 2018

Ms. Kimberly Manzione
Licensing Manager
Holtec International
Holtec Center
One Holtec Drive
Marlton, NJ 08053

SUBJECT: APPROVAL OF HOLTEC INTERNATIONAL REQUEST FOR WITHHOLDING
INFORMATION FROM PUBLIC DISCLOSURE—CERTIFICATE OF
COMPLIANCE NO. 1014, HI-STORM 100 MULTIPURPOSE CANISTER
STORAGE SYSTEM, AMENDMENT REQUEST NO. 12

Dear Ms. Manzione:

By letter dated July 22, 2016, November 4, 2016, August 25, 2017, and November 10, 2017, you submitted affidavits requesting that certain information contained in these submittals for the HI-STORM 100 Multipurpose Canister Storage System, Amendment No. 12 to be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 2, Section 2.390.

As applicable, a non-proprietary copy of the submittals is placed in the U.S. Nuclear Regulatory Commission's (NRC's) Public Document Room and added to the Agencywide Documents Access and Management System Public Electronic Reading Room.

The affidavits state that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- The information discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by Holtec's competitors without license from Holtec International constitutes a competitive economic advantage over other companies.
- The information, if used by a competitor, would reduce the expenditure of resources or improve the competitive position of the competitor in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.
- The information discloses patentable subject matter for which Holtec may be desirable to obtain patent protection.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified of the date of public disclosure, in advance, which will be a reasonable time thereafter.

If you have any questions regarding this matter, you may contact me at 301-415-1018.

Sincerely,

/RA/

Yen-Ju Chen, Senior Project Manager
Spent Fuel Licensing Branch
Division of Spent Fuel Management
Office of Nuclear Material Safety
and Safeguards
