

## NOTICE OF DEVIATION

Public Service Electric and Gas Company  
Salem Nuclear Generating Station,  
Units 1 and 2  
Hope Creek Generating Station  
Unit 1

Docket Nos. 50-272  
50-311  
50-354  
License Nos. DPR-70  
DPR-75  
NPF-57

During an NRC inspection conducted on April 5-7, 1993, a deviation of one of the licensee's Fitness-for-Duty (FFD) Program commitments was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the deviation is listed below:

In a January 29, 1991, letter to the NRC, the licensee committed that: "Individuals permanently assigned to nuclear department facilities are available for random testing. All other individuals granted unescorted access must either: access the site protected area at least once every 60 days, or make themselves available for random testing. Failure to comply with these requirements will result in loss of unescorted access. Affected individuals must satisfy all normal access requirements to regain unescorted access. Our policy begins March, 1991."

Contrary to the above, the licensee did not remove the unescorted access from individuals non-permanently assigned to nuclear departmental facilities who failed to access the protected area at least once every 60 days or cause those individuals to be randomly tested.

Please provide to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region I, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, in writing within 30 days of the date of this Notice, the reason(s) for the deviation, the corrective steps which have been taken and the results achieved, the corrective steps which will be taken to avoid further deviations, and the date when your corrective action will be completed. Where good cause is shown, consideration will be given to extending the response time.
