 Document Control Desk  
 Washington, D.C. 20555

Gentlemen:

**Subject:** Salem Generating Station  
 Docket Nos. 50-272 and 50-311  
 License Change Request LCR 89-06, Revision 1  
 Reactor Trip System (RTS) and Engineered Safety  
 Features Actuation System (ESFAS) Revisions

By letter dated February 2, 1993, Public Service Electric and Gas Company (PSE&G) submitted the Revision 1 of the subject license change request to the Nuclear Regulatory Commission (NRC). In their original submittal dated May 11, 1992, a number of minor discrepancies were identified which are corrected in this submittal. Additionally, PSE&G has included several administrative Technical Specification changes that were not identified in their original request.

The New Jersey Department of Environmental Protection and Energy's Bureau of Nuclear Engineering (BNE) reviewed the above amendment in accordance with the requirements of 10CFR50.91(b). Based on this review, BNE does not have any comments on this request.

If you have any questions, please contact Suren Singh at (609) 987-2039 or Rich Pinney at (609) 987-2086.

Sincerely,

*Kent W. Tosch*

Kent Tosch, Manager  
 Bureau of Nuclear Engineering
