Docket Nos. 50-272  
50-311  
50-354

Mr. Steven E. Miltenberger  
Vice President and Chief Nuclear Officer  
Public Service Electric and Gas Company  
P. O. Box 236  
Hancocks Bridge, New Jersey 08038

Dear Mr. Miltenberger:

SUBJECT: MOTOR-OPERATED VALVE INSPECTION AT SALEM/HOPE CREEK  
POWER STATIONS, INSPECTION REPORT NOS. 50-272/93-24,  
50-311/93-24 AND 50-354/93-26

This letter refers to an announced NRC safety inspection conducted by Mr. T. Kenny on October 5-8, 1993, at Salem/Hope Creek Power Stations, to address clarification or improvement items discussed in Table 1 of NRC Inspection Report Nos. 50-272/92-80 and 50-311/92-80. The results of this inspection were discussed with Mr. J. Ranalli, Nuclear Mechanical Engineering Manager, of your staff on October 8, 1993.

The inspector examined procedures, representative records, interviewed personnel and overall observed areas important to public health and safety. The inspection focused mainly on the motor-operated valve (MOV) program, and the implementation of program enhancements developed in response to previous NRC team inspections in this area. This program implementation inspection was used to confirm continuing progress toward the scheduled program completion date and to assure satisfactory implementation of your commitments to regulatory requirements. Several items were satisfactorily closed, including violations, a deviation, and unresolved items (delineated in the enclosed report). We found your MOV program implementation satisfactory and did not identify any new items.
