SUBJECT: 10 CFR 50.54 QUALITY ASSURANCE PROGRAM CHANGE REVIEW

References: (a) Letter, dated September 27, 1994, from
Steven E. Miltenberger to U. S. Nuclear Regulatory
Commission transmitting a Proposed Quality Assurance Program
Change

Dear Mr. Eliason:

We received your 10 CFR 50.54(a) and 10 CFR 50.71(e) submittal, referenced above, transmitting a change request to the Quality Assurance Program and corresponding Final Safety Analysis Report (FSAR) change for the Hope Creek and Salem Generating Stations. The Region I staff has reviewed this submittal, in accordance with 10 CFR 50.54(a), and determined that the change to the Quality Assurance Program and FSAR, that allows assessments of QA Program administrative and implementing procedures, is acceptable in that there is no reduction in program commitment and the Quality Assurance Program continues to satisfy the criteria of Appendix B of 10 CFR 50. The effectiveness of your Quality Assurance Program and procedure implementation will continue to be the subject of routine regional inspections.

Please refer to (Quality Assurance) QA 94-22 in future correspondence regarding this issue. If you have any questions concerning the above, please contact James Trapp at (610) 337-5186.

Sincerely,

Original Signed by:

Michael C. Modes, Chief
Materials Section
Division of Reactor Safety

OCT 17 REC'D *[Signature]*

Gentlemen:

**PROPOSED REVISIONS TO THE
QUALITY ASSURANCE PROGRAM
HOPE CREEK AND SALEM GENERATING STATIONS
FACILITY OPERATING LICENSE NOS. NPF-57, DPR-70 AND DPR-75
DOCKET NOS. 50-354, 50-311 AND 50-272**

In accordance with 10 CFR 50.54(a)(3), Public Service Electric & Gas is proposing to revise the Quality Assurance (QA) Program contained in Section 17.2 of the Updated Final Safety Analysis Report (UFSAR) for both Hope Creek and the Salem Generating Stations.

The proposed changes revise the responsibility of the Manager - Quality Assurance (QA) Programs and Audits. Specifically, the responsibility of the Manager - QA Programs and Audits would be revised so that assessments of QA Program administrative and implementing procedures can be performed. The proposed changes would allow for a more effective evaluation of QA Program administrative and implementing procedures, with focus on process requirements. In addition, associated changes which add clarification to the UFSARs are also included.

A description of the proposed changes, reason and the basis for concluding that the revised QA Program incorporating the proposed changes continue to satisfy the criteria of 10 CFR 50 Appendix B and the UFSAR QA Program description commitments previously accepted by the NRC are provided in Attachment 1. The UFSAR pages affected by the proposed change are marked-up in Attachment 2.
