

May 30, 1995

Mr. Leon R. Eliason  
Chief Nuclear Officer & President  
Nuclear Business Unit  
Public Service Electric and Gas Company  
P. O. Box 236  
Hancocks Bridge, New Jersey 08038

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-272/95-11 AND 50-311/95-11

Dear Mr. Eliason:

This letter refers to the announced inspection conducted by Mr. L. Cheung of this office from May 11 to May 12, 1995, at Salem Generating Station, Units 1 and 2, located in Hancocks Bridge, New Jersey. At the conclusion of the inspection, the inspector discussed the inspection findings with members of your staff, identified in the enclosed report.

This inspection was directed toward areas important to public health and safety. Areas examined during this inspection included your corrective actions to address previously identified issues, as described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of design documents, procedures and representative records, interviews with personnel, and observation by the inspector.

We found your corrective actions to resolve four electrical items to be adequate. All four items reviewed during the inspection were closed. The inspector determined that management oversight in providing support to resolve the technical issues of electrical open items was generally good, and the engineering personnel were knowledgeable.

No response to this letter is required, and your cooperation with us in this matter is appreciated. If you have any questions, please call me at (610) 337-5376.

Sincerely,

*Original Signed By:*

William H. Ruiland, Chief  
Electrical Section  
Division of Reactor Safety
