Title: Notice of Teleconference with New York State Energy Research and Development Authority (NYSERDA).

Date(s) and Time(s): April 12, 2018, 01:00 PM to 02:00 PM

Location: Teleconference

Category: This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.

Purpose: This teleconference is in response to NYSEDA's April 6, 2018, letter, requesting a public meeting with the NRC staff to discuss Entergy's submittal to use an alternative method to address reactor penetration weld flaws for Indian Point, Unit 2 (IP2). In its letter, NYSEDA requested the NRC staff to convene a public meeting to discuss NRC's analysis of Entergy's submittal before IP2 returns to service.

Interested members of the public can participate in this meeting via a toll-free audio teleconference. The dial-in information is provided below. This will allow members of the public to participate in the meeting in listen-only mode. However, instructions will be provided for how to request to speak during the public question-and-answer portion of the meeting. A telephone moderator will open phone lines on a first-come/first-served basis.
