Gentlemen:

Subject: Salem Generating Station Unit Nos. 1 and 2
Docket Nos. 50-272 and 50-311
License Change Request LCR 95-23
Electrical Power Systems- Shutdown

Public Service Electric and Gas Company submitted the subject amendment to the Nuclear Regulatory Commission on September 28, 1995. This request modifies Section 3/4.8.1.2, Electrical Power Sources - Shutdown. The surveillance requirement 4.8.1.2 is clarified by a note to identify those surveillances which are required to be performed during Modes 5 and 6.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering reviewed the above amendment in accordance with the requirements of 10CFR50.91(b) and has no comments.

If you have any questions, please contact Rich Pinney at (609) 987-2086.

Sincerely,

Kent Tosch, Manager
