Gentlemen:

**UPDATED FINAL SAFETY ANALYSIS REPORT
ERRATA TO REVISION 14
SALEM GENERATING STATION UNITS 1 AND 2
DOCKET NOS. 50-272 and 50-311**

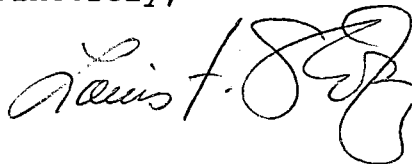

Revision 14 to the Salem Updated Final Safety Analysis Report (UFSAR) was submitted under letter LR-N95246 dated December 28, 1995. Public Service Electric and Gas (PSE&G) is issuing this errata to Revision 14 to correct problems discovered since the submittal.

This errata corrects the following problems: several pages printed on the incorrect side of the page causing page insertion problems, missing and mislocated change bar indicators, typographical errors and omissions, and provision of the master table of contents for only one of the seven UFSAR volumes.

Overall, the technical impact of these changes has been assessed to be minimal. PSE&G has taken actions to minimize such occurrences in the future.

Should there be any questions with regard to this submittal, please do not hesitate to contact us.

Sincerely,
