Gentlemen:

**REVISION TO COMMITMENT  
SALEM GENERATING STATIONS  
UNIT NOS. 1 AND 2  
DOCKET NOS. 50-272 AND 50-311**

By letters dated June 13, 1997 "Response to NRC Notice of Violation Inspection Report 50-272/97-07 and 50-311/97-07," (Our Ref: LR-N970348) and Licensee Event Report 311/97-004-00 dated May 7, 1997 (Our Ref: LR-N97278), Public Service Electric and Gas (PSE&G) committed to evaluate the need for additional enhancements to the Technical Specification Action Tracking log, and to have any identified improvements implemented by July 15, 1997. According to the PSE&G commitment management program, PSE&G is revising its commitment to have the evaluation and the identified improvements implemented by August 15, 1997.

As stated in the June 13 letter, PSE&G improved the Technical Specification Action Tracking log by removing items that were not pertinent to the applicable Mode and sectionalizing the log to mimic Technical Specifications. The Operations Department staff has been significantly taxed as a result of a large emergent workload associated with the Salem Unit 2 restart and the annual requalification training. However, based on the enhancements already implemented to the Technical Specification Action Tracking log, PSE&G concludes that delaying the implementation of any additional identified enhancements to August 15, 1997, does not compromise the safe operation of the Salem Units.

Should there be any questions, please contact us.

Sincerely,

*Paul Hachow for LFS*
