SUBJECT
Follow up phone call to discuss a single draft technical request for additional information (RAIs) the Trojan Independent Spent Fuel Storage Installation (ISFSI) renewal application

SUMMARY

A phone call was held between NRC and Portland General Electric (PGE) to discuss a draft technical RAI on the Trojan ISFSI license renewal application. The full set of draft RAIs were originally provided to PGE on March 28, 2018 and discussed on 4/12/2018. One RAI discussed on 4/12/2018 remained unclear. NRC staff discussed and decided the unclear portion of the RAI was addressed though the other portion of the RAI that requested information on the potential for aging effects. This follow up phone call communicated the decision to remove the unclear portion of the RAI.

PGE indicated they may transmit the RAI responses in two batches. For some that require less effort, they may target a late June submission. They would target submitting by the end of October for the second batch.

Continue on Page 2

ACTION REQUIRED (IF ANY)
The NRC will issue the final RAI letter to PGE.
