

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

April 25, 2018

LICENSEE: Dominion Energy Nuclear Connecticut, Inc.

FACILITY: Millstone Power Station, Unit No. 3

SUBJECT: SUMMARY OF APRIL 10, 2018, PUBLIC TELECONFERENCE WITH DOMINION ENERGY NUCLEAR CONNECTICUT, INC. ON PLANNED RELIEF REQUEST SUBMITTAL CONCERNING THE INSERVICE TESTING OF THE 'C' CHARGING PUMP (EPID L-2018-LRM-0021)

On April 10, 2018, a Category 1 public meeting via teleconference call was held between the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Dominion Energy Nuclear Connecticut, Inc. (DENC, the licensee). The purpose of the meeting was to discuss DENC's plan to submit a relief request proposing to discontinue the quarterly Group A test on the Millstone Power Station, Unit No. 3 (MPS3), "C" Charging Pump for the time periods when the pump is not required to be credited to support continued plant operation. The meeting notice and agenda, dated March 27, 2018, are available in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML18086B728. The presentation material used by the licensee is available in ADAMS at Accession No. ML18108A207. A list of attendees is provided in the Enclosure.

The licensee presented an overview of the following areas:

- Proposed alternative to the requirements of Operations and Maintenance Code (OM Code) ISTB Article 3400 and Table 3400-1
- MPS3 charging pump configuration and pumps credited for technical specification compliance
- Current testing requirements of MPS3 "C" Charging Pump and impacts on the high pressure safety injection function availability
- Implementation actions following approval of the proposed alternative

The NRC staff informed the DENC representatives that the following areas should be considered in their proposed submittal:

- Clarification on whether the proposed alternative would provide an acceptable level of quality and safety or would result in a hardship or unusual difficulty
- Demonstrating how pump degradation during idle periods is justified
- Description of the crediting of the charging pumps in terms of Chapter 15 event mitigation

The licensee stated that their planned submittal is on track and projected for submission within 30 days. The licensee stated that the requested approval of the relief request will be coincident with the new inservice testing interval which is approximately December 12, 2018.

There were no members of the public in attendance by teleconference. No public meeting feedback forms have been submitted through the NRC public meeting feedback system.

No regulatory decisions were made during the public telephone conference. Please direct any inquiries to me at (301) 415-1030 or Richard.Guzman@nrc.gov.

A handwritten signature in black ink, appearing to read 'R. Guzman', with a long horizontal flourish extending to the right.

Richard V. Guzman, Senior Project Manager
Plant Licensing Branch I
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
