Docket Nos. 50-280  
50-281

Dear Mr. Denton:

RADIOLOGICAL EFFLUENT TECHNICAL SPECIFICATION  
SURRY POWER STATION

Our response to Mr. Vanallo's letter of July 10, 1978, has been delayed beyond the date of January 15, 1979 submitted in our letter of November 3, 1978. We now intend to submit our proposed Technical Specification change, Offsite Dose Calculation Manual, and the Process Control Program by February 28, 1979. This time is needed because of the company's desire to complete the proposed North Anna radiation effluent technical specifications first and the changing guidance for these new specifications from the NRC Staff.

Very truly yours,

*C. M. Stallings*
