***** THE END *****

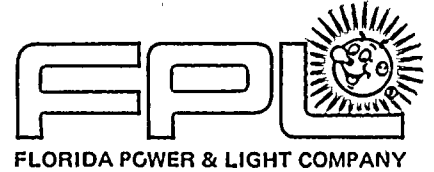

The first part of the document discusses the importance of maintaining accurate records. It emphasizes that proper record-keeping is essential for the effective management of any organization. This section also touches upon the legal implications of record retention and the potential consequences of non-compliance.

In the second section, the focus shifts to the practical aspects of record management. It provides a detailed overview of the various methods and tools used to collect, store, and retrieve information. The text highlights the benefits of modern record management systems, such as improved efficiency and enhanced security.

The third section addresses the challenges associated with record management in a digital age. It discusses the risks of data loss, the complexity of managing large volumes of electronic data, and the need for robust backup and recovery strategies. The text also explores the role of metadata in organizing and searching digital records.

Finally, the document concludes by summarizing the key points discussed throughout the text. It reiterates the importance of a proactive approach to record management and the need for ongoing education and training for staff. The text ends with a call to action, encouraging organizations to take the necessary steps to ensure their records are well-managed and protected.

This document is intended to provide a comprehensive overview of record management practices. It is not intended to constitute legal advice, and readers should consult with their legal counsel for specific guidance. The information provided here is for informational purposes only and is subject to change without notice.

Office of Nuclear Reactor Regulation
Attention: Mr. Victor Stello, Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

50-335

Dear Mr. Stello:

Re: Completion of Conditions of License

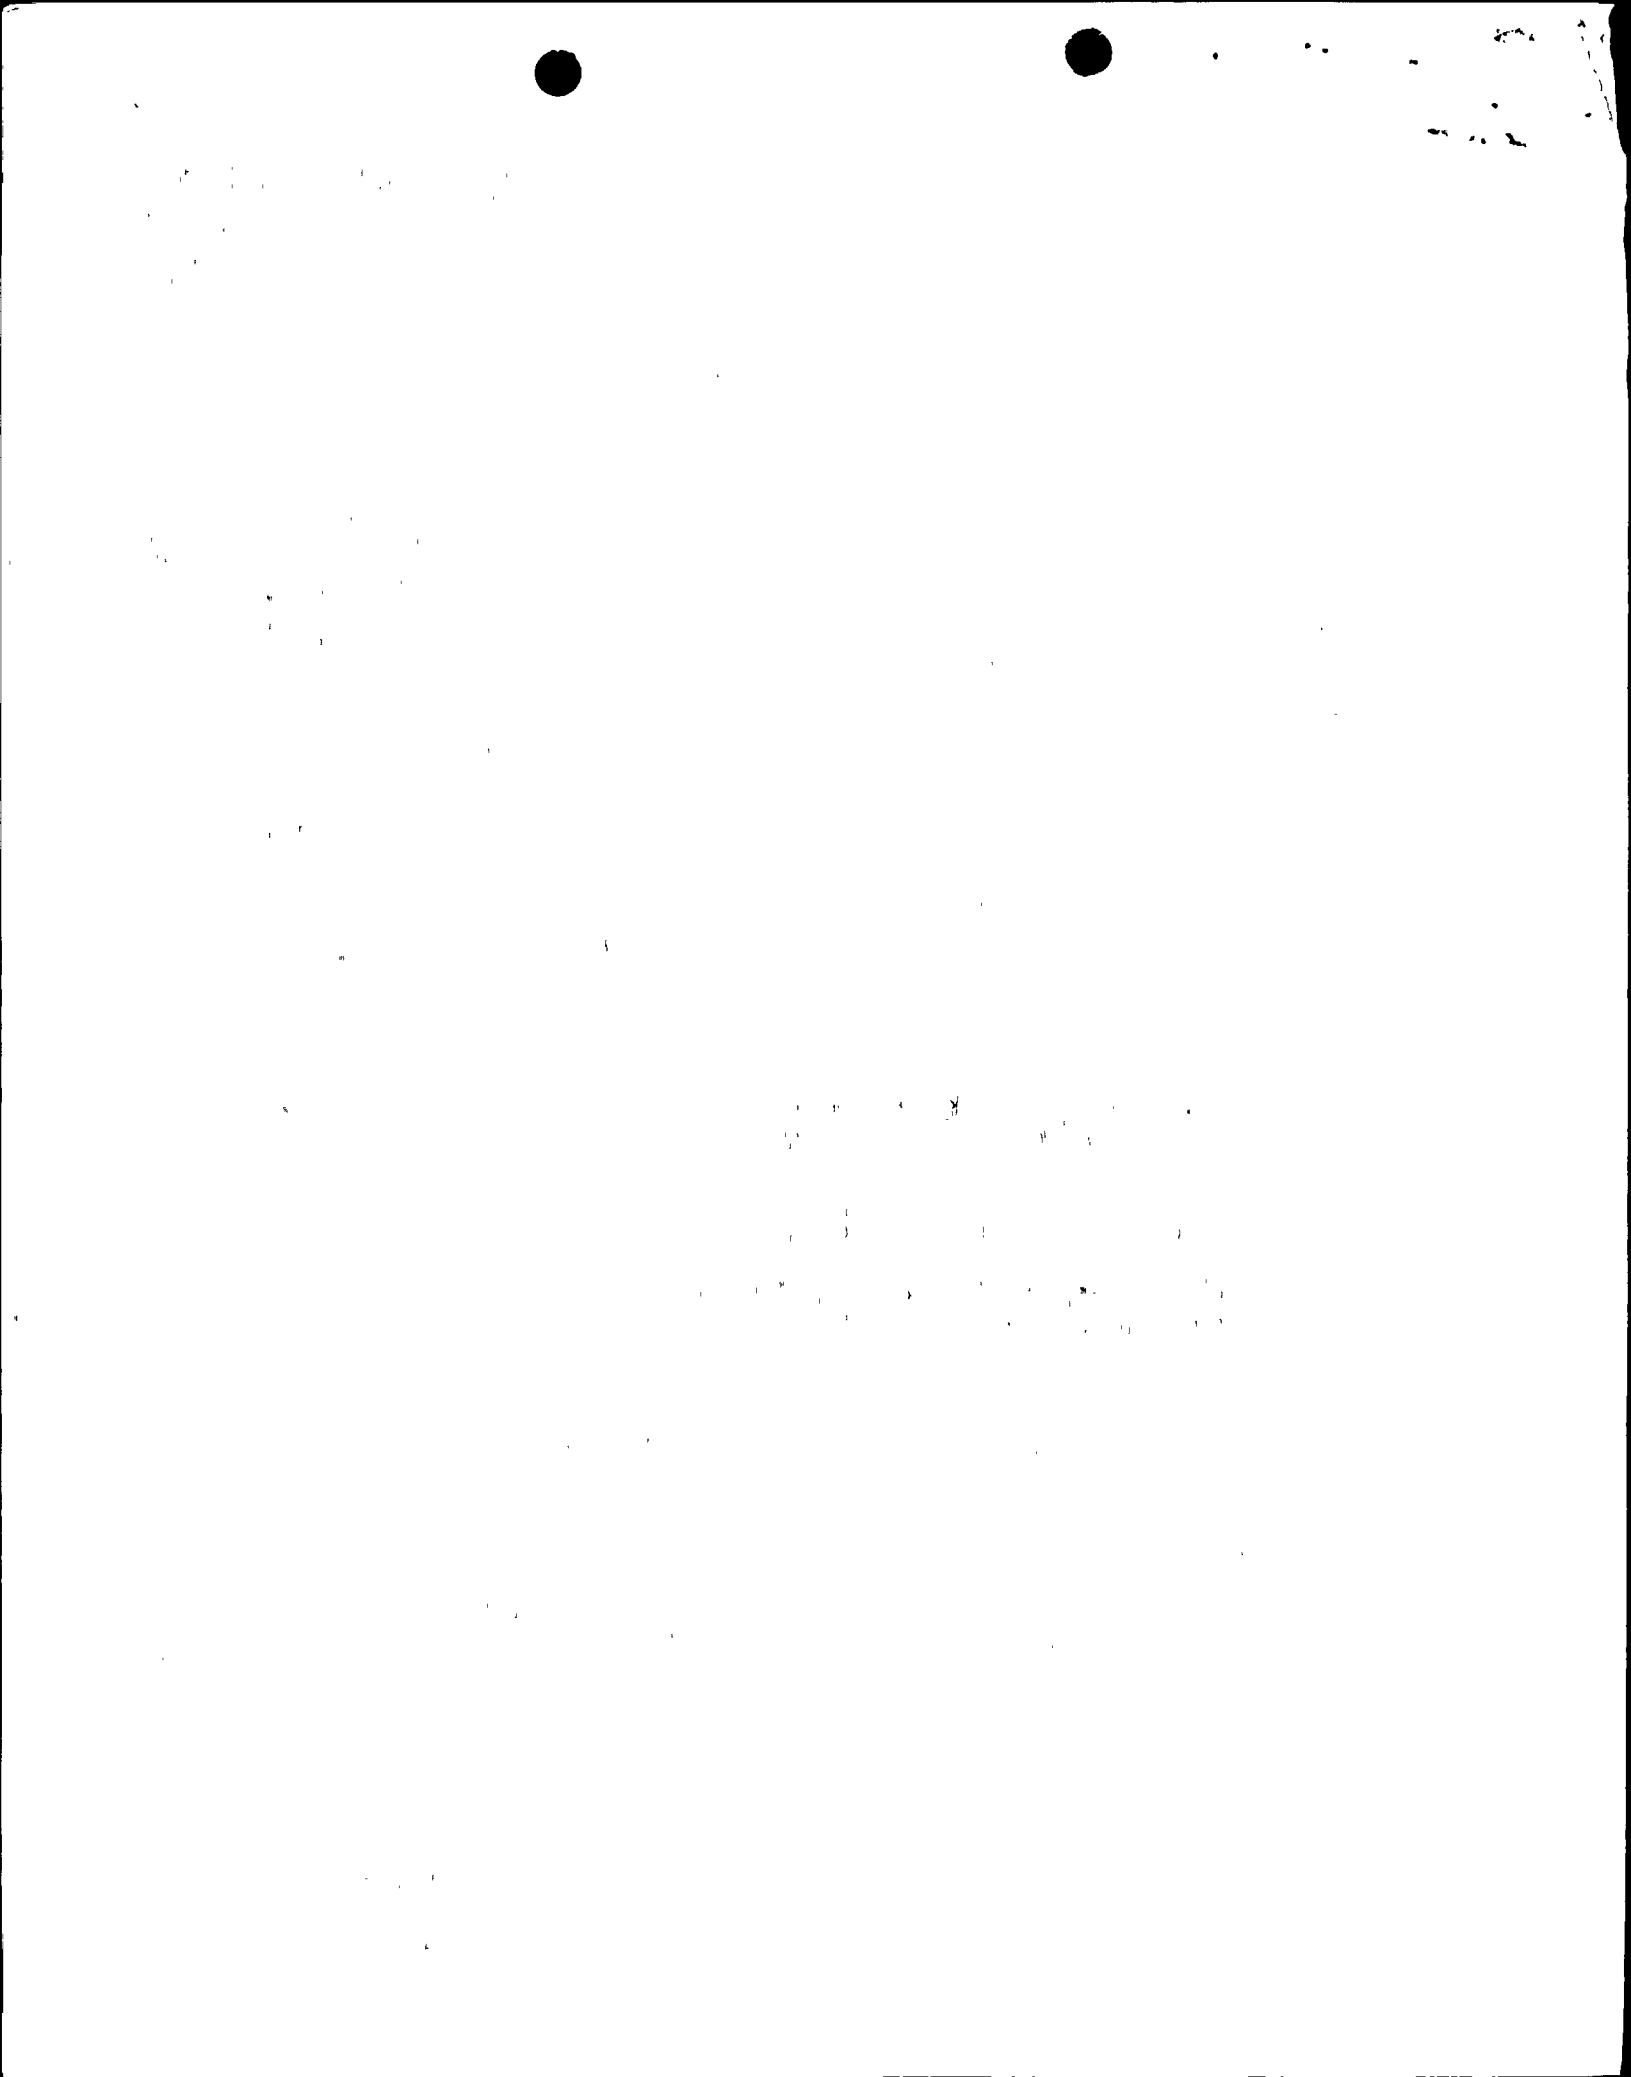

Enclosure 1 to Operating License No. DPR-67 identified certain items which must be completed to the satisfaction of the Commission prior to certain specified times and operating conditions. This is to advise you that the following items on that list have been completed:

- I.3 Installation of redundant and independent valve position indication for the mini-flow bypass valves (V-3659 and V-3660).
- I.5 Installation of the necessary hardware associated with St. Lucie Plant Unit No. 1 to permit future interties to Unit No. 2. The systems to be so intertied are:
 - a. diesel generator fuel oil storage tanks
 - b. auxiliary feedwater system (condensate storage tank)

Additionally, item M of Enclosure 1 requires certain additional monitoring in MODE 1 if excore monitoring is used with less than 10,000MWD/MTU burnup. We wish to advise further that burnup at St. Lucie 1 exceeded 11,000 MWD/MTU as of February 13, 1978.

780660036

A001/S
3/0

Mr. Victor Stello
Page Two

Accordingly, we request that items I.3, I.5, and M be deleted from
Enclosure 1 to License DPR-67 as conditions of license.

Yours very truly,

Robert E. Uhrig
Vice President
