

VIRGINIA ELECTRIC AND POWER COMPANY
RICHMOND, VIRGINIA 23261

May 4, 1979

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
Attn: Mr. Albert Schwencer, Chief
Operating Reactors Branch No. 1
Division of Reactor Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Serial No. 253
LQA/RMN:esh
Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Dear Mr. Denton:

AMENDMENT TO OPERATING LICENSE
SURRY POWER STATION UNIT NOS. 1 AND 2
PROPOSED TECHNICAL SPECIFICATION CHANGE NO. 71
ADDITIONAL INFORMATION

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requested, by letter dated August 31, 1978, Serial No. 500, an amendment in the form of changes to the Technical Specifications to Operating License Nos. DPR-32 and DPR-37 for Surry Power Station, Unit Nos. 1 and 2. The proposed changes, designated as Change No. 71, were to reflect a reorganization of the Production Operations Department onsite and offsite and to incorporate several minor changes and corrections. Enclosed is additional information on this change.

The August 31, 1978, submittal included a revised Figure 6.1-1, the Power organizational chart. There has been a management reorganization since then which is reflected in the attached revised Figure 6.1-1. The reorganization is designed to increase efficiency and therefore enhance safety.

This proposed change has been reviewed and approved by the Station Nuclear Safety and Operating Committee, and the System Nuclear Safety and Operating Committee. It has been determined that this request does not involve an unreviewed safety question, as defined in 10 CFR 50.59.

Very truly yours,

C. M. Stallings

Vice President-Power Supply
and Production Operations

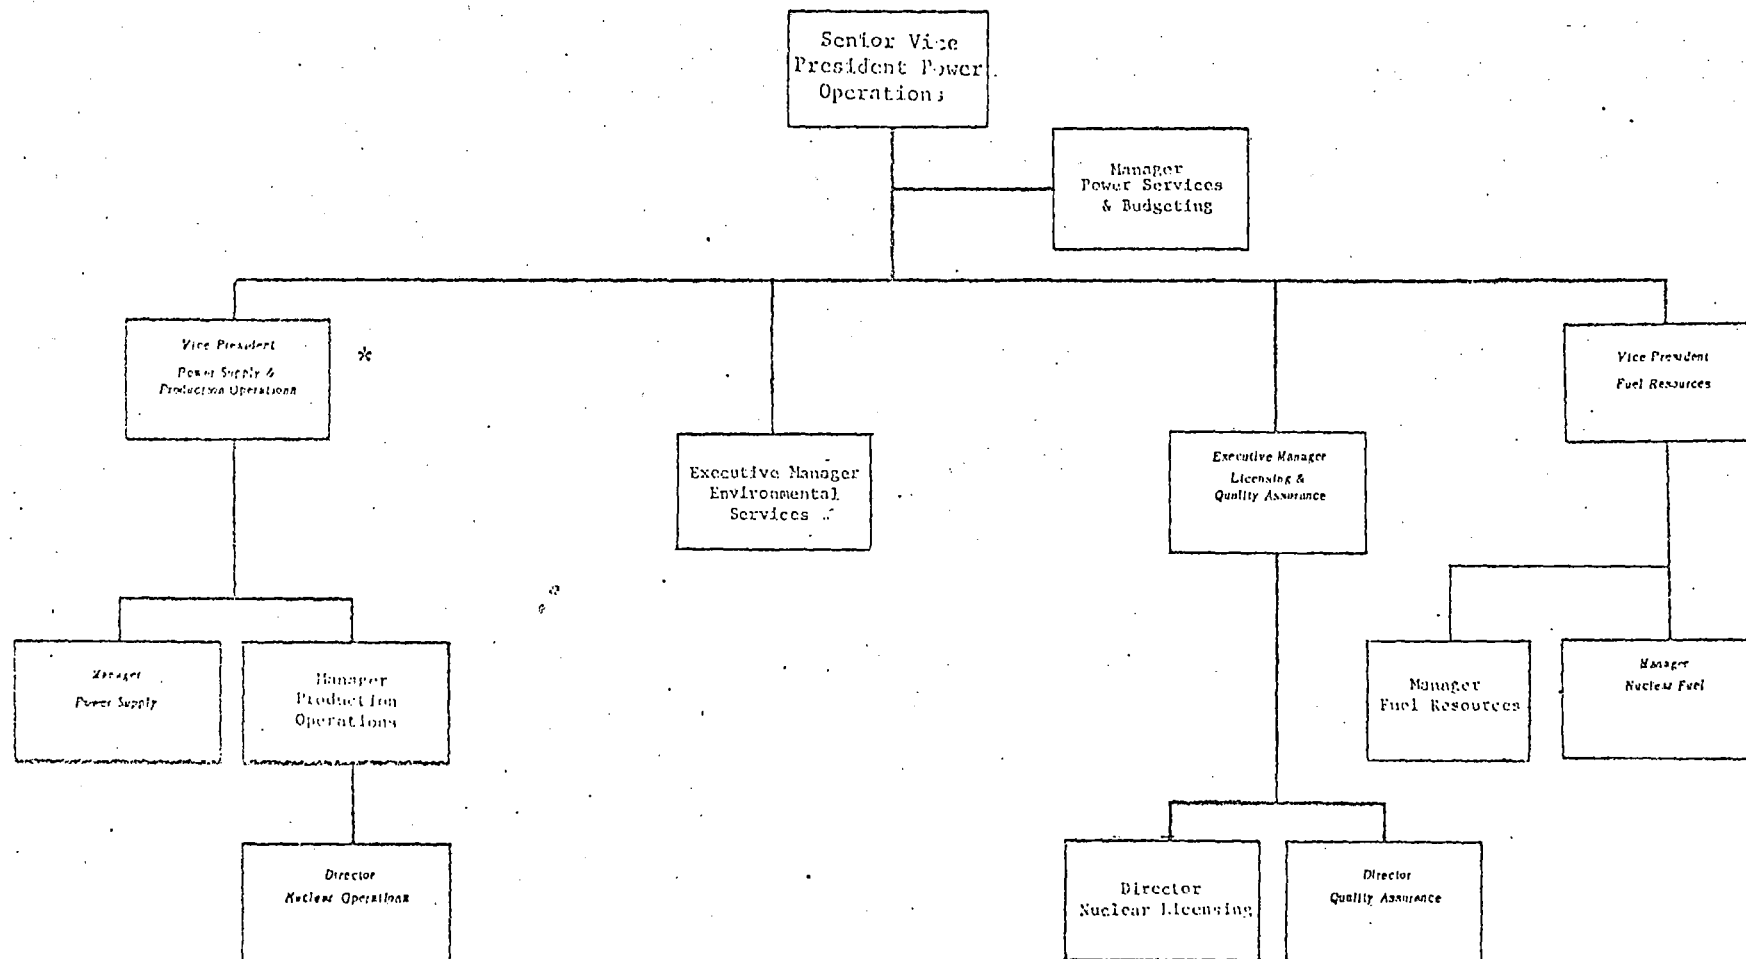

Attachment:
Proposed Technical Specification
