APR 20 2018

Matthew C. Kim
Director of Radiation
Safety/Radiation Safety Officer
Mistras Group, Inc.
161 Tower Dr., Suite E
Burr Ridge, IL 60527

Dear Mr. Kim:

Enclosed is Amendment No. 38 to your NRC Materials License No. 12-16559-02 in accordance with your request dated January 20, 2018.

Please note that your license is now in landscape format in accordance with NRC policy. Also, certain items and conditions of your license have been changed or removed per current NRC policy. Specifically, former Condition 18 regarding transportation was removed since this is referenced in the preamble of the license. Also, Items 6, 7 and 8 and Condition 15 were significantly updated.

With letter dated April 5, 2018, you requested to remove three authorized locations of use for unrestricted use. You provided a facility decommissioning report to support your request for two of the locations. The NRC staff has reviewed all of this information, including the final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the facilities at (1) BP Exploration Alaska, CIC Pad, DSM49, Prudhoe Bay, Alaska, and (2) 46645 Kenai Spur Highway, Suite A, Kenai, Alaska, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Therefore, you may release both of those locations for unrestricted use. In addition, we confirmed that no operations or storage were conducted at the third location located at 32273 Old Nash Road, Seward, Alaska. Therefore, you may also release that location for unrestricted use.

Please review the enclosed documents carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Bryan A. Parker
