August 9, 1979

Mr. Victor Stello, Jr., Director
Division of Operating Reactors
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Serial No. 492B-
PO/FHT:baw
Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Dear Mr. Stello:

Surry Power Station Units 1 and 2
Information on PWR Feedwater Lines
Amended Response

In our letter of June 20, 1979, Serial No. 492, we responded to your May 25, 1979, letter requesting information concerning feedwater piping. Section III.5 of our response contains a transcription error with respect to the dates of the chemistry control method change. Units 1 and 2 used Phosphate Chemistry prior to 1975 (not 1979). Unit 1 changed to AVT January 2, 1975, and Unit 2 changed to AVT January 4, 1975.

Very truly yours,

C. M. Stallings

C. M. Stallings
Vice President-Power Supply
and Production Operations
