Triston W. Dougall, M.S.
Radiation Safety Officer
Mercy Health Saint Mary's
200 Jefferson Ave. SE
Grand Rapids, MI 49503

Dear Mr. Dougall:

Enclosed is Amendment No. 95 to your NRC Material License No. 21-01078-01 in accordance with your request.

Please note that we were not able to add Dr. Rapoport for 10 CFR 35.1000 yttrium-90 microsphere uses at this time because in the documentation provided it was not clear if the preceptor was attesting to 80 hours of classroom and laboratory training. If you wish to pursue this request, please review the documentation provided and clarify the training that was provided and whom it was provided. Please also ensure the attestation statement is clear as to what the preceptor is confirming and is currently dated.

In addition, we were not able to add Dr. Spear for 10 CFR 35.300 parenteral administration of any beta-emitting or photon emitting radionuclide uses because the NRC form 313A (AUT) was not complete and referenced an older, also incomplete, NRC Form 313A. If you wish to pursue this request, please resubmit NRC Form 313A (AUT) with the information for classroom and laboratory training and supervised work experience completed. If the training does not meet the requirements of 10 CFR 35.59, please also include in your response documentation of recentness of training and experience.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and

The enclosed document contains sensitive security-related information.

organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 of the Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jennifer L. Bishop
