## General Comment

Hello, why dont the states that have nuclear energy store their own waste. Since it is so clean that shouldnt be an issue. NM is tired of being the dumping ground. I am a nurse and have heard when I worked at NM DOH that Tularosa and Alamogordo had a significant increase in birth defects and cancers for two generations after the bombs were tested. Carlsbad WICC has had leaks already. We survive on our ground water which this site could effect for generations.

I moved here from Houston to get away from smog and population by choice. This venture is not worth the money. We need to stop prostituting the state just for money. I like NM because the skys are clear with no smog and few people. Please stop bringing NM nuclear waste.

Thank you for your time and effort.
