Subject: [External_Sender] RE: Groundwater Question from Feb 22
Attachments: Groundwater ROCs 3-13-18 FINAL.docx

Jim,

Please find attached the response to the question Leah asked during the call.

We can be available to discuss this for a call this Thursday. Other than this response we do not have any agenda items for a call.

Thanks,

Ken

Subject: FW: Groundwater Question from Feb 22

Ken and Clark

I am having a senior moment, I don't recall this question being asked on the 2/22/2018 call, but Leah is rarely if ever wrong, so I assume you two will remember and provide a status on the response to her question.

Also, do you have the most current version of the matrix of the FSSRs and ADAMS accession numbers?

Thanks

Jim

Subject: Groundwater Question from Feb 22

Jim,

Has the licensee responded to the question that I asked during the February 22 call yet on groundwater samples?

Specifically, I had asked them to confirm which groundwater samples had confirmed that only U-234, U-235, U-238 and Tc-99 where the primary radionuclides of concern.

Thanks,

Leah
