REGULATORY DOCKET FILE COPY

October 25, 1977

Office of Nuclear Reactor Regulation  
Attn: Mr. Don K. Davis, Acting Chief  
Operating Reactors Branch #2  
Division of Operating Reactors  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Davis:

Re: Condition of License G.1  
St. Lucie Unit No. 1  
Docket No. 50-335

Condition of License G.1 of Enclosure 1 to License No. DPR-67, as modified by your letter of May 24, 1977, requires installation of erosion protection for that part of the discharge canal peninsula associated with St. Lucie Plant Unit No. 1 by October 31, 1977. Your letter further stipulated that the design of the erosion protection was to conform to that previously approved in your Mr. Ziemann's letter of November 2, 1976.

Installation of the required erosion protection has been completed as specified, as noted by Mr. R. C. Parker of the Office of Inspection and Enforcement in his report #77-12, dated October 3, 1977. Accordingly, Florida Power & Light Company herewith requests that this condition of license be deleted and that written authorization be given for continued operation beyond October 31, 1977.

Yours very truly,

*REASON*

Robert E. Uhrig
