Subject: NRC Notification to the State of Florida Regarding St. Lucie License Amendments - Inoperable Aux. Feed Pump Steam Supply Tech Spec change

Good morning Ms. Becker,

As a follow-up to my phone message from this morning, the U.S. Nuclear Regulatory Commission (NRC) is about to issue license amendments for the St. Lucie Nuclear Plant, Units 1 & 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of these amendments.

Please reply if the State of Florida has comments on the following licensing action submitted to the NRC by Florida Power & Light Company, et al. (the licensee): "License Amendment Request to Add New Required Actions for an Inoperable Auxiliary Feedwater Pump Steam Supply" dated September 14, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17257A300).

The associated proposed no significant hazards consideration for this amendment request was published in the Federal Register on November 7, 2017 (82 FR 51652).

Your response is requested by May 15, 2018. If you have any questions, please call or e-mail me.

Thanks,

Perry Buckberg
