1. GNRO-2017/00035, Notice of Readiness of 95001 Supplemental Inspection
2. EA-17-184, Grand Gulf Nuclear Station – NRC Supplemental Inspection Report, Assessment Follow-Up Letter 05000416/2017013 and Parallel White Performance Indicator Inspection Finding

Dear Sir or Madam:

This letter serves as notification of Grand Gulf Nuclear Station's readiness for your office to perform a 95001 Supplemental Inspection. This would be an inspection of the white Performance Indicator in Unplanned Scrams per 7000 Critical Hours.

The NRC conducted a 95001 supplemental inspection (Reference 2) in August 2017. This inspection identified two significant weaknesses in the causal analysis associated with the white performance indicator. Entergy has reviewed the identified weaknesses and revised the appropriate causal analysis to address and correct the significant weaknesses.

This letter contains no new commitments. Should you have any questions or require additional information, please contact Douglas A. Neve at (601) 437-2103.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Larson", with a long horizontal flourish extending to the right.

Eric A. Larson
Site Vice President
