Subject: NRC Part 71 QAP Application

Dear Mr. Whaley,

The NRC has received and I have been assigned to review your 10 CFR Part 71 Quality Assurance Program (QAP) application to use Type B packages. An acceptance review of the submittal has been performed and it was determined that your request has enough detail to perform a full review. If the NRC has questions and needs additional information, a letter will be issued with a Request for Additional Information (RAI). The NRC will discuss our questions with you informally, normally by teleconference, before the formal letter goes out to ensure both parties have a good understanding of the questions and information needed to complete the review. If there are no RAIs or your responses to the NRC's RAIs are satisfactory, an approval of your Part 71 Quality Assurance Program will be issued. The NRC's goal is to complete the full review of your request by June 1 and discuss RAIs, if any, with you the week of June 4.

The NRC has also completed a review of your submittal to determine if it can be made publicly available in our document management system (ADAMS). The NRC has determined that it should be made publicly available, but I wanted to verify with you that it does not contain any proprietary information that should not be released to the public. Please let me know at your earliest convenience.

Any questions or concerns please let me know.

V / r,

Jeremy Tapp
