SUBJECT: RESPONSE TO NRC INSPECTION REPORT 030-36909/2018-001 AND NOTICE  
OF VIOLATION

Dear Mr. Ayers:

On April 2, 2018, the U.S. Nuclear Regulatory Commission (NRC) cited CMG Engineering, Inc., for two violations, which involved the failure to document the radiation protection program audit, and the failure to ensure that each portable nuclear gauge has a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The NRC Inspection Report 030-36909/2018-001 with enclosed Notice of Violation (Notice) required you to respond in writing within 30 days (NRC Agencywide Documents Access and Management System (ADAMS) Accession ML18088A019). In a letter received April 30, 2018, you provided your response to the Notice of Violation.

After reviewing the information provided in your response to the Notice, we have concluded that your completed and proposed actions appear to adequately address the regulatory noncompliance described in the Notice. We will review your implementation of these corrective actions during a future inspection to determine whether full compliance has been restored and whether compliance will be maintained.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedures," a copy of this letter will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/
