## General Comment

Please halt the plan to transport and store nuclear waste in New Mexico. There are many dangers to doing either of these things. Not only is the waste itself full of risks to health and the environment, but if even a slim possibility exists of an accident during transport (there have been seven in the past) or storage, the harm to people and the environment will have immediate and long-lasting repercussions. It is every person's ethical duty to speak out against this.
