General Comment

I respectfully disagree with Holtec's Application and ask that it not be approved. I live in Carlsbad and have for 42 years. I do not want Southeastern New Mexico to become the "Nuclear Waste Dump" of the world. One project here being the WIPP site is sufficient. Additionally, accidents do happen and containers get breached. There is no man made waste container or system in the world which is not subject to a breach or failure. We already had one container breach at the WIPP site near Carlsbad which resulted in the facility being shut down for 11/2 years. Materials inside the container, which included cat litter, caused the breach and the rupture of the container. Also, the proposed Holtec facility is for really "Hot" nuclear waste being spent fuel rods. This type of nuclear waste is very dangerous to health and safety of human beings. One facility here in Southeastern New Mexico is more than enough. I ask that the Holtec Application be rejected. As a community member am very much opposed to the project and will not support it.
