Subject: NRC Notification of State of Florida Regarding Turkey Point 3 and 4 License Amendments - Changes Regarding ISI and IST Requirements and SFCP Applicability

Ms. Becker,

The U.S. Nuclear Regulatory Commission (NRC) is preparing to issue license amendments for the Turkey Point Nuclear Generating Unit Nos. 3 and 4. In accordance with Title 10 of the *Code of Federal Regulations*, Section 50.91(b), I am notifying you of the proposed issuance of these amendments.

Please reply if the State of Florida has comments on the following licensing action submitted to the NRC by Florida Power & Light Company (the licensee): "License Amendment Request (LAR) 248, Changes to Technical Specifications Regarding Inservice Testing Program and Inservice Inspection Program Requirements and Surveillance Frequency Control Program Applicability," dated June 28, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17180A447), as supplemented by letter dated February 28, 2018 (ADAMS Accession No. ML18075A023).

The associated proposed no significant hazards consideration for this amendment request was originally published in the *Federal Register* on August 29, 2017 (82 FR 41069). The supplemental letter dated February 28, 2018, expanded the scope of the request as originally noticed; therefore, the NRC published another notice in the *Federal Register* on April 10, 2018 (83 FR 15417), which replaced the original notice in its entirety.

Your response is requested by May 18, 2018. If you have any questions, please call me at (301) 415-6459.

Thank you,
Mike

Michael Wentzel
