Dear Mr. Denton:

VEPCO VERSION OF THE COBRA IIIC/MIT COMPUTER CODE MANUAL

Enclosed are ten (10) copies of the Vepco version of the COBRA IIIC/MIT computer code manual. This information is being sent to facilitate your review of the Vepco Topical Report VEP-FRD-33 transmitted by my letter to you dated September 28, 1979, Serial No. 795.

The enclosed report was prepared by the Massachusetts Institute of Technology for the Electric Power Research Institute, and it documents the development of the COBRA IIIC/MIT computer code. Appendix 12 of this report, "New INPUT DATA Presentation," has been modified to reflect the new input data requirements resulting from the Vepco modifications described in VEP-FRD-33. Appendix 12 documented herein thus presents the input option which is currently utilized in the Vepco Reactor Core Thermal-Hydraulic Analysis Capability.

If you have any questions on the material in this report, please contact us.

Very truly yours,

W. N. Thomas
Vice President
Fuel Resources
