RE: Homestake Mining Company's (Homestake) Water Use Report Letter of Information No. 684 for April 2018

Dear Mr. Burrus,

This information is relative to files 1605 and B-28 for April 2018.

On April 30, 2018 the meter readings for Deep Well #1 (B-28-S), Deep Well #2 (B-28-S-1), well 943 (B-28-S-329), and well 951R (B-28-POD1340) were 541,709,440, 527,569,000, 3,357,435 and 848,290,000 gallons, respectively. The small amount of water pumped from wells 943 and 951R during April was for sampling of these two wells except for the usage of well 951R in the early portion of April and was not counted in water usage. Monthly meter readings and volumes of water usage are presented in Table 2.

Metered gallons of 38,430,170 [total water injected] or 117.94 acre-feet (see next to last column in Table 1) were injected into wells in the San Mateo alluvial aquifer and the Upper and Middle Chinle aquifers, all located in Sections 26, 27, 28, 34 and 35 T12N, R10W and Section 3 T11N, R10W. As stated in Permit No. 1605 and B-28 Temp, Homestake requests return flow credits for water that is returned to underground aquifers. A portion of this injected water was alluvial aquifer water treated by reverse osmosis.

A monthly total of [industrial diversion] 41,936,264 metered gallons or 128.70 acre-feet (see tenth column in Table 1) of water were pumped from Homestake's production wells, of which 38,430,170 metered gallons [total water injected], were returned to the Bluewater underground water basin. Metered water used for industrial purposes was [industrial consumption] 3,506,094 gallons or 10.76 acre feet for April.

Thank you very much for your time and attention, if you have any questions regarding the foregoing information, I can be reached at 505-290-2187.

Respectfully,

A handwritten signature in cursive script that reads "Thomas Wohlford".
