Subject: [External_Sender] RE: NRC License Amendment
Date: Monday, May 07, 2018 10:50:52 AM

Good Morning Mr. Lawyer,

I have been in contact with Mr. Ragnald about AC-227 sample. Mr. Ragnald is copied on this email. This sample is picked-up by RSO, Inc. for disposal. My delay is due to some confusion emails from RSO because they had difficulties to find a disposal site. Finally, RSO, Inc. found a disposal site and it is being processed for disposal. Therefore, we do not need to amend our license now to include AC-227 in our research license# 08-00386-19.

Thank you so much for your kind cooperation – Regards – Satya Bose

Subject: NRC License Amendment

Dr. Bose,

I must write a license amendment this week as my authorized time has run out. Our last conversation was that you didn't need an amendment for the Actinium Series material because it was disposed but you wanted to get the approval of your Radiation Safety Committee. After that you stated the you were going to write a letter stating that you no longer needed the addition of the Actinium Series Isotopes. I have not seen such a letter as of today. Can you reply back today if you still need this amendment?
