

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
2100 RENAISSANCE BLVD.  
KING OF PRUSSIA, PA 19406-2713

May 9, 2018

Anthony K. Wutoh, Ph.D., R.Ph., Provost  
and Chief Academic Officer  
Howard University  
Radiation Safety Office  
Cancer Center, Room 323  
2041 Georgia Avenue, N.W.  
Washington, D.C. 20060

SUBJECT: HOWARD UNIVERSITY, LICENSE AMENDMENT, MAIL CONTROL NO.  
602387

Dear Dr. Wutoh:

This refers to your license amendment request dated February 13, 2018. Please find enclosed Amendment No. 30 changing the mailing address on the license. The request to add Actinium series isotope to the license was not performed, as Dr. Bose notified us that it was no longer needed.

An environmental assessment for this action was not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please contact me at Dennis Lawyer or via electronic mail at [dennis.lawyer@comcast.net](mailto:dennis.lawyer@comcast.net) so that appropriate corrections or answers can be provided.

You will be periodically inspected by the NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action(s) against you. This could include issuance of a Notice of Violation, or Imposition of a Civil Penalty, or an Order Suspending, Modifying or Revoking Your License as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available at:  
<http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

An electronic version of the NRC's regulations is available on the NRC Web Site at: [www.nrc.gov](http://www.nrc.gov). Additional information regarding use of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture

A. Wutoh
