SUBJECT: CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT 1 AND 2 - CORRECTION TO RELIEF REQUESTS FOR THE FIFTH 10-YEAR INTERVAL INSERVICE TESTING PROGRAM FOR PUMPS AND VALVES (EPID L-2017-LLR-0076, EPID L-2017-LLR-0077, AND EPID L-2017-LLR-0078)

Dear Mr. Hanson:

By letter dated May 10, 2018 (Agencywide Documents and Access Management System (ADAMS) Accession No. ML18117A264), the U.S. Nuclear Regulatory Commission (NRC) issued its authorization letter for Alternative Requests SI-RR-01, Revision 0; GV-RR-01, Revision 0; and RC-RR-01, Revision 0, requested by Exelon Generation Company, LLC (the licensee) in its letter dated August 2, 2017 (ADAMS Accession No. ML17215A007), as supplemented by letter dated February 16, 2018 (ADAMS Accession No. ML18047A124). The authorization was for alternatives to the requirements of the American Society of Mechanical Engineers Code for Operation and Maintenance of Nuclear Power Plants, associated with pump and valve inservice testing, for the fifth 10-year inservice testing program interval at Calvert Cliffs Nuclear Power Plant, Units 1 and 2.

The authorization letter did not explicitly state that the Alternative Request SI-RR-01, Revision 0, was authorized. The licensee's request for the use of the alternatives stated in the August 2, 2017 letter, as supplemented by letter dated February 16, 2018, was authorized pursuant to Title 10 of the *Code of Federal Regulations* Section 50.55a(a)(z)(1) for Calvert Cliffs Nuclear Power Plant, Units 1 and 2, for the fifth 10-year inservice testing program interval.

The titles of Sections 3.2 and 3.3 of the safety evaluation enclosed with the authorization letter dated May 10, 2018 are incorrect. The correct title for Section 3.2 is "Alternative Request RC-RR-01, Revision 0" and for Section 3.3 is "Alternative Request SI-RR-01, Revision 0."

B. Hanson
